

Blockchain Recruitment Services

Technical

“

One of the most professional agencies
in the space and still willing to learn!

”

HR Manager - Blockchain Research Foundation

About CK Technical

CK Technical is one the UK's leading technical recruitment specialists. Since 2001 we have helped our clients find high calibre engineers and IT professionals in the IT, blockchain, scientific, chemical, waste, biotechnology and pharmaceutical sectors globally.

As part of the CK Group, our team of blockchain recruiters build on a reputation of nearly 30 years of specialist recruitment services. Our track record of identifying and delivering talent quickly and efficiently is second to none.

Blockchain Recruitment Service

CK Technical has grown to become a valued partner to both start up and established blockchain technology groups and companies throughout the world.

Working with clients from the USA, UK, Europe and Asia, CK Technical have a track record in delivering both contract and permanent recruitment solutions.

We handle a diverse range of technical positions including:

- Full Stack Developer
- Blockchain Architect
- Rust Developer
- Security Engineer
- Solidity Developer
- Head of Research
- Operations
- C Suite
- DevOps Engineer
- Site Reliability Engineer
- QA Engineer
- Cryptography Researcher

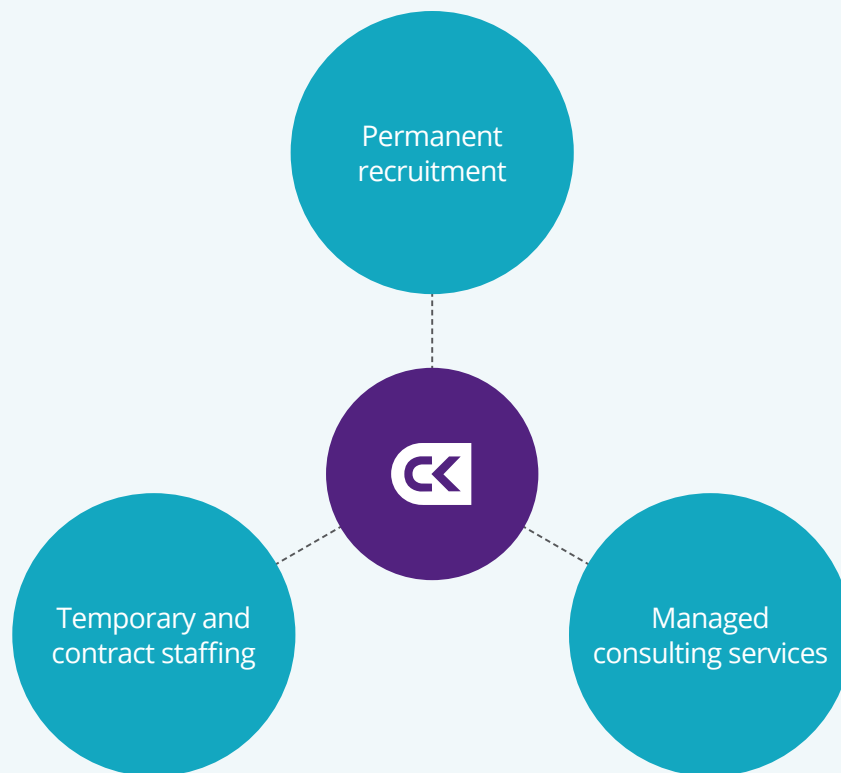

Our clients range from companies establishing new blockchain services and applications, through to organisations in the finance and pharmaceutical sector, who are integrating blockchain technology into their business operations.

“ I have been working as a client with CK since 2012 and I have been impressed with their adaptability and professionalism. Recently I have been helping a crypto start-up scaling up and was impressed with the performance of CK Technical. Recruiting for blockchain is by default a challenging job especially due to candidate expectations and talent scarcity. CK sourced matching candidates despite the specs being difficult, provided great insight into the profiles and more than anything showed tremendous flexibility regarding changes to the job requirements. ”

Senior Project Manager - Global Pharmaceutical Organisation

Services

We offer a range of full spectrum recruitment services:

Permanent recruitment

Our permanent recruitment service is designed to find and attract the right talent to build your business. Having the right person will enhance your business, whilst saving significant time and money.

We appreciate that the technology market is fast paced and having the right skills in your team, at the right time can be the key to success. Our team have built a global network of Blockchain specialists meaning that we can quickly and efficiently introduce you to talented people to work for your business.

Temporary recruitment

We understand the fast-paced environment you work in, so we know that sometimes your need for temporary staff can be reactive, and out of the blue.

Managed consultancy services

Our managed consultancy team delivers projects to key performance indicators. We recruit and then manage highly skilled teams to efficiently deliver your project on time.

This enables you to concentrate on your business without the day-to-day hassle of management or staffing issues.

We have many years of experience in this type of service provision and have successfully delivered world renowned projects.

Screening

All potential candidates complete an application form which requests information, such as reference details, proof of ID, qualifications and right to work. If a candidate is offered a position and accepts, our compliance team follow up any references and authenticates stated qualifications. This is a vital process to ensure our workers are qualified, eligible and validated before they commence work with you.

In house payroll

We operate an automated and fully scalable payroll service for many of our clients. If you have already identified suitable contract workers but need to payroll them through an external party, CK can do this for you.

Online timesheets

We have a dedicated online system to streamline the approval process for working hours and expenses. It enables timesheets to be completed, submitted and approved electronically at the click of a button.

For more information on CK Technical's staffing services contact us today.
