

Recruitment Team at CK QLS AG

We find roles for high calibre professionals working in the life sciences sector. With an office based in Zug, we specialise in the Swiss markets but have a wider network extending across Europe, the UK and the US. We are confident that we can support any resourcing needs you have in our markets.

We have our own recruitment, screening and in-house payroll service to provide a rapid and seamless end to end recruitment service for flexible labour resources.

Our SECO license and connections to the best talent in the Swiss market provide peace of mind that not only will you have access to the skills that you need but that you will be working with a quality driven, licensed business.

We make sure to keep in touch with both candidates and client during the whole process, even after placement. We can create bespoke videos about a role, aiming to increase the candidates attraction and make your role stand out from the competition.

As part of the CK Group, we work with some of the most forward thinking businesses, helping them to find the right talent, from global pharmaceutical organisations to industry start-ups.

We're proud to work with most of the world top 30 pharmaceutical and biotech companies.

Services we offer:

- » **Individual contractors** – Working closely with you to rapidly identify and recruit the best people for your interim position or project.
 - » **Project team delivery** – Let us recruit and employ full teams to deliver your project to save your team time and money.
 - » **Permanent recruitment services** – Working with you to find quality and talented hires who will fit your team for the long term.
 - » **International recruitment support** – With access to talent from around the world CK QLS can support you with identifying the right skills for your business in over 50 countries.
 - » **Retained search** – Personalised approach for critical roles whether it's a niche skillset, senior, confidential, strategic, or there are multiple hires allowing us to commit time and ensuring the best results for your project.
-
